DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

In addition to the previous elections required, applicant is further required to elect for each of the following species (i)-(vii):

- (i) a single method specie, from the method species recited in claims 2, 107 or 108;
- (ii) whether (claim 97, 123) or not (claim 2, 107, 108) the composition is administered before, during or after one of the therapies recited in claim 97 or 123; if a therapy of claim 97 or 123 is included in the method, applicant must also elect a single therapy specie from the therapies recited in claims 97 and 123;
- (iii) a single formulation route specie, elected from the species recited in claims 99-100 or claims 125-126;
- (iv) whether (claim 102, 128) or not (claim 99, 125) the composition is formulated for controlled or sustained release;
- (v) a single formulation specie from the species recited in claim 103 or 129;
- (vi) specify each of the formulation components present (if present) from the species recited in claims 104 and 130;
- (vii) a single tumor cell specie from the species recited in claim 106 or 132.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic for (i); claims 2, 98-108 and 124-132 are generic for (ii); claims 2, 6-7, 10, 17-18, 20-24, 26, 98-99, 102-125 and 128-132 are generic for (iii); claims 2, 6-7, 10, 17-18, 20-24, 26, 98-101, 103-127 and 128-132 are generic for (iv); claims 2, 6-7, 10, 17-18, 20-24, 26, 98-102, 104-128 and 130-132 are generic for (v); all claims are generic for (vi) and (vii).

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to TIMOTHY P. THOMAS whose telephone number is (571)272-8994. The examiner can normally be reached on Monday-Thursday 6:30 a.m. - 5:00 p.m..
